About this document

This document contains information about issues that were encountered during deliveries of this course. These issues will be addressed in subsequent updates of the material.

You should review this document before the start of class, and use this list as the first point of reference if issues arise.

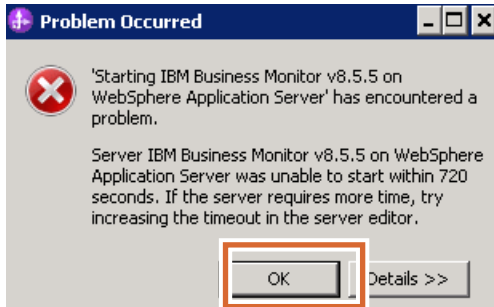

Student Exercises Guide items

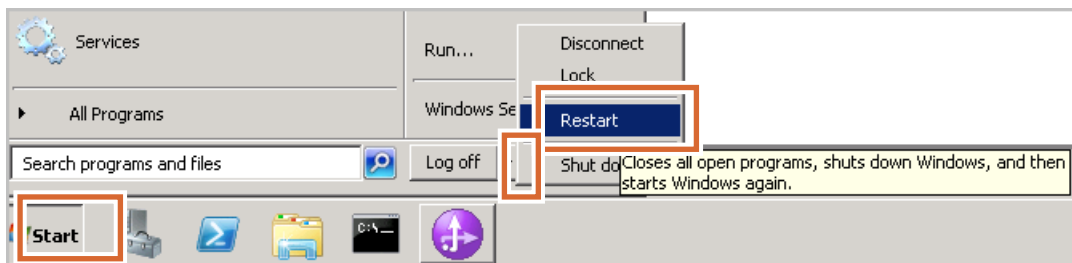

SSL certificate expiration might cause IBM Process Server or IBM Business Monitor server to throw errors or fail to start.

The first time that you start the server is on p. 1-16 in Exercise 1, Part 1, step 1b.

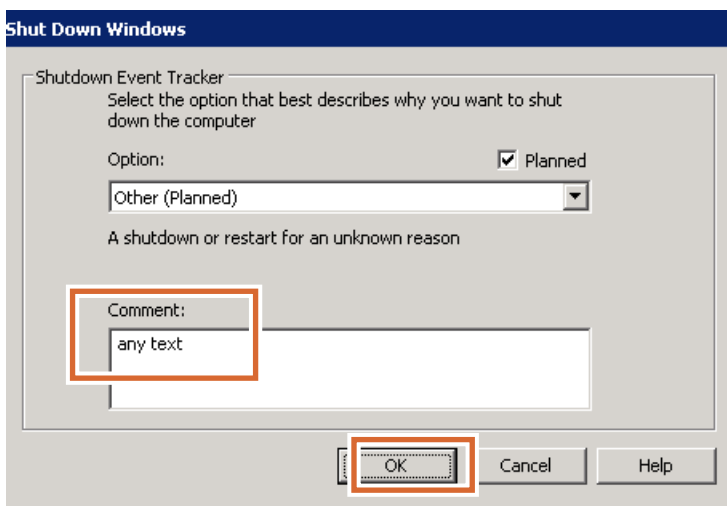

If the server fails to start, close the Problem Occurred window by clicking **OK**, and then close IBM Integration Designer.

Restart the operating system by clicking **Start > Restart**

In Shut Down Windows, enter some text in the **Comment** field and click **OK**.

The operating system restarts. Wait few minutes and then log back in to the environment. Go back to the step in your exercise where you were working. This time, the server should start with no errors.

Student Notebook items

None reported.

Course presentation items by unit

None reported.
