Course Abstract
</div>

Course description

This course trains:

- The skills that are needed to create, configure and maintain component queues.

Duration

1/2 day

Delivery Method

Instructor-led (Classroom), Instructor-led Online and SPVC (Self-Paced Virtual course)

Audience

- A **workflow system administrator** responsible for creating, configuring and maintaining component queues in non-development environments.
- A **workflow author** responsible for creating, configuring and maintaining component queues in development environments.
- **Anyone** who needs to create, configure or maintain component queues.

Prerequisites

Prior knowledge that is required:

- Basic knowledge of organization's business process applications.
- Basic knowledge of database technology.
- PCs, networks, and their organization's server operating systems at the expert level
- Prerequisite courses:

    ➢ F115G IBM FileNet Content Manager 5.2: Implementation and Administration

    ➢ F230G IBM Case Foundation 5.2.1: Introduction

    ➢ F231G IBM Case Foundation 5.2.1: Configure the workflow system

    ➢ F232G IBM Case Foundation 5.2.1: Workflow security

    ➢ F233G IBM Case Foundation 5.2.1: Maintain the workflow system

    ➢ F234G IBM Case Foundation 5.2.1: Manage work in progress

Course Objectives

Upon completion of this course, participants are able to:

- Understand the purpose of component integration in workflow applications.

- Understand the architecture of the Component Manager Frameworks.
- Understand what component queues provide.
- Create and configure a Java component.
- Monitor and maintain component queues.
