## Duration

4 hours

## Delivery Method

ILT (Instructor led training) and SPVC (Self Paced Virtual course)

## Audience

This course is intended for system administrators and solution builders.

## Prerequisites

- F270 – IBM Content Navigator 2.0.3.6: Introduction or equivalent knowledge
- P8 terminology, including: Content Platform Engine, IBM Content Navigator, object stores, objects, Content Services, Process Services.
- Using IBM Content Navigator to work with content.
- Configuring desktops in IBM Content Navigator.
- Recommended prerequisite courses:
    - F270 – IBM Content Navigator 2.0.3.6: Introduction

## Course Objectives

Upon completion of this course, participants will be able to:

- Identify components, features, and common use cases for IBM FileNet Content Manager.
- Find the core web applications that make up IBM FileNet Content Manager.
- Use Administration Console for Content Platform Engine (ACCE) to find properties within the Global Configuration database.
- Use ACCE to find folders, classes, and property templates in an object store.

## Topics

**Introduction to IBM FileNet Content Manager**

Identify core components of IBM FileNet Content Manager.

Identify content management capabilities.

Describe how IBM FileNet Content Manager can be used to address business needs in different industries.

**IBM FileNet Content Manager architecture**

Identify the components of an IBM FileNet Content Manager system.

Identify the dependencies between the core components.

**Administration Console for Content Platform Engine**

Use Administration Console for Content Platform Engine to locate FileNet P8 domain objects.
